

Gluten Statement

Some people are sensitive to proteins in cereals collectively called gluten and found in wheat, barley, rye, oats or their crossbred varieties and derivatives thereof. Gluten intolerance or coeliac disease is quite common and there is a specific group of the population suffering from a permanent intolerance to gluten.

We confirm herewith that our products, Belcolade dark chocolate, milk chocolate and white chocolate, produced at the Belcolade site in Erembodegem, do not contain any wheat, barley or rye and derivatives containing gluten. The absence (< 20 ppm) of gluten containing products in our factory excludes any cross contamination. Our products can thus be used to manufacture "gluten free" foodstuffs.
